

# Data Management On Demand (DMOD)

## *Monthly Retainer Packages*

Designed for organizations that have ongoing data management needs.

- Evaluate business process flows for optimization
- Have ongoing small software development projects
- Want ad-hoc queries and reports for better business insight
- Keep your business applications and databases running smoothly
- Build and maintain automated processes to import or export data

DMOD is an affordable way to get business insights and efficiency.

- Twice per month, we'll meet to set priorities, tackle any challenges, and communicate progress
- Our team will work from a running list of open items for the agreed upon hours
- You stay within a fixed budget each month

**Improve business insights and efficiency** by working with an Eclipse Consulting data management expert. Packages start as low as \$1500 per month.

### Skills:

- Programming and integrations
- Data analysis and reporting
